

STEPS 2014

TEACHING SEMINAR

under the auspices of

European Pediatric Surgeons Association (EUPSA)

ANORECTAL MALFORMATIONS & HIRSCHSPRUNG'S DISEASE

ANNOUNCEMENT

26th -27th September, 2014

Helsinki, Finland

Dear Colleagues,

It is a pleasure to invite you to the 2014 STEPS (Strategies & Trends in European Pediatric Surgery) Seminar under the auspices of EUPSA (European Pediatric Surgeons Association) to be held in Helsinki, Finland from the 26th-27th September.

The 2014 teaching seminar this year will focus on “Anorectal malformations and Hirschsprung’s Disease”. Both the topics still offer challenges to the pediatric surgical community due to large variations in presentations. Experts from Europe and overseas have been invited to deliver State-of-the-Art lectures and share their experiences in the diagnosis, management and outcomes in these areas.

Helsinki is an interesting location as it is spread across a number of bays and peninsulas and over a number of islands. The inner city area occupies a southern peninsula, which is rarely referred to by its actual name Vironniemi. Much of Helsinki outside the inner city area consists of postwar suburbs separated from each other by patches of forest. A narrow, ten-kilometer-long Helsinki Central Park that stretches from the inner city to the northern border of Helsinki is an important recreational area for residents.

The University of Helsinki is located in Helsinki since 1829, but was founded in the city of Turku in 1640 as The Royal Academy of Turku, at that time part of the Swedish Empire. It is the oldest and largest university in Finland with the widest range of disciplines across 11 faculties and 11 research institutes, and promises to be an excellent location for this seminar.

Prof. Risto Rintala and the local organizing team along with the staff of the Hospital for Children and Adolescents, University of Helsinki as well as the team of STEPS, welcome you to the city of Helsinki for STEPS 2014.
