General Hospital.  
Director of Postgraduate Medical School, including setting-up  
the State Medical Library and a programme of visiting lecturers  
(90 lecturers in 4½ years).

SUMMARY

My experience is principally under the following headings:-

General Surgery and Paediatric Surgery

I have been continuously in surgical practice for over 40 years.  
Whilst the term "general surgery" is well-understood, no surgeon

I should be very interested in an opportunity to make any of these skills available. Having recently been overseas for 4½ years, I should prefer not to undertake overseas stints of more than a few months at a time.

Close involvement in these ventures has provided experience of the complex problems involved in planning and organisation.

- Rebuilding of Middlesex while I was there.
- Moving Maxillofacial Unit from North Africa to Italy.
- Moving 800-bed Hospital from Venice to Vienna.
- Rebuilding Surgical Block at Guy's.
- Rebuilding Tower Block at Guy's.

Besides my recent experience in Brunel, other instructive experiences have included:-

Construction  
Medical Input and Direction and Equipping of Hospitals under

3

I have been continuously engaged in teaching undergraduate students, surgeons-in-training at all stages, as well as nurses, physiotherapists and others.

Teaching Surgery

2

Covers the whole field of surgery. I do not undertake cardiac surgery, vascular surgery or neurosurgery, for example. On the other hand I have had more than usual experience of plastic surgery, orthopaedics and fractures.
